STANDARD FOR EXCELLENCE DISCIPLINARY GUIDELINE

The United Association Standard for Excellence policy not only outlines the obligations of UA members on the job; it also spells out the obligations of our signatory contractors as well. In this way, we are making it clear to all parties – including construction owners – that we are dedicated to doing the best job possible.

Employees are obligated to provide a fair day’s work for a fair day’s wages. Contractors must be fair to employees, but also have a role in the promotion of a strong unionized sector. Being fair does not mean “looking the other way” when an infraction occurs. Nor does it mean that the Contractor should merely lay off an incompetent or insubordinate employee when that employee may need counseling, discipline or, in irreparable and egregious cases, exclusion from the industry. All parties have a role in this regard. The United Association and its signatory contractors hereby have established and shall maintain a common disciplinary guideline.

It is agreed that the United Association and its signatory contractors will make all parties aware of the disciplinary guideline for violation of company and client on-site rules.

PROGRESSIVE DISCIPLINARY GUIDELINE

1. **VERBAL WARNING:** An employee who has committed an infraction is verbally warned and told that if the infraction occurs again (within some specified period), the degree of disciplinary action will be increased.

Some examples: minor safety policy violations, minor work-site disruptions, poor workmanship issues, attendance (reporting to work late) problems, verbal abuse to Supervisor and co-workers.

2. **WRITTEN WARNING:** If the employee again commits the same or similar violation within the specified period (or possibly an unrelated infraction), the employee will be given a written warning which will be placed on his/her personnel file. The employee will be told that if any further misconduct occurs, the employee will be disciplined again, more severely.
3. **SUSPENSION AND FINAL WARNING:** If the employee again transgresses in the misconduct, he/she will be suspended from employment for a period of time without pay and will be given a final warning.

4.

This warning clearly will normally specify discharge as the result of another infraction. This step may be repeated, however, for example, a one-day, then a five-day suspension.

5. **DISCHARGE:** If the employee again is guilty of misconduct (as outlined in Step 3), the employee may be discharged.

The Employee may also be immediately discharged, at the Contractor's discretion, for serious disciplinary misconduct.

In other cases of sufficiently serious misconduct, the Contractor at its discretion may skip any of the preceding steps.

Some examples of serious disciplinary misconduct: Fraud, Severe Health and Safety policy violations, severe work place disruptions, workplace violence and/ or intimidation, etc.

Pipe Fabrication in Canada

Brothers,

Since my letter dated October 27th, 2009 regarding pipe fabrication for comfort heating and cooling and plumbing I have received numerous letters from across the country. The majority of these letters support the concept with only one local having minor reservations to opening up this avenue for our fair contractors.

These responses show me we are recognizing the need to adapt and modify our practices to “move forward’ and recapture our rightful market share.

It is time to put our trust in one another and work with our industry partners to regain our position as the workforce of choice in the piping industry across this country. As you have heard me say numerous times before if we retain the status quo there will be no UA in the foreseeable future and therefore no one to fight for the rights of our loyal members and their families.

I realize that in many areas across the country collective agreements will be renewed in the coming months. Some might say that this issue should rightfully be decided at the bargaining table. Well history tells me that initiatives such as this seldom remain on the table when the bargaining gets down to the final strokes, and in the end we settle for money and little else that will help our industry.

It is my belief that by putting forward this **national Initiative** we will be sending a message to our contractors and clients that the UA is serious about change and they should join us in the fight to better our competitive position in the marketplace.

I recognize there will be challenges. I am also confident that we have the fortitude and political will necessary to develop the trust and cooperation with our members and fair contractors that we need to be successful. I have faith in our leaders across this country that they will heed the message given to us by our members to get back our markets and get back their job opportunities.

I have been travelling across this country over the past few months and the feedback I am getting from our members is that they support positive change and they support forward thinking and progressive leadership. As we move forward our leaders will need to be innovative free thinkers with the vision to follow the course set out by our Strategic Planning Committee and the mental toughness needed to

outthink and out work our competition, while communicating and connecting with the 95% or better of our members who truly are the UA.

So how will it work?

The initiative that I will be presenting to our contractors is as follows:

- Signatory contractors working under the terms and conditions of local or provincial ICI collective agreements will have the right to pre-fabricate piping four inch (4") and over for any comfort heating and cooling in any of their facilities under agreement with the United Association.
- In any jurisdiction that has mandated mobility provisions (such as Ontario) in their agreement the installing contractor must provide to the local union Business Manager, where the piping is to be installed, an accurate assessment of the full-time equivalent of manpower performing the work in their shop and the mobility provisions will be reduced accordingly.
- Signatory contractors working under the terms and conditions of local or Provincial ICI collective agreements wishing to pre-fabricate plumbing (all sizes) will contact the local union Business Manager, where the plumbing is to be installed, and demonstrate the cost efficiencies for such fabrication and perform a similar assessment of full-time manpower equivalencies regarding mobility.
- This initiative will be in effect for a period of two years commencing January 1st, 2010 and ending on December 31st, 2011. It will apply to any job bid during that period.
- The Canadian Director with the area representatives will review this initiative on or about November 30th, 2011 to determine whether the initiative should be extended, at that time, and periodically thereafter if the program is continued.
- During the course of the initiative being in effect it is expected and necessary that both successes and difficulties with this program be communicated in writing to the Canadian Office or to the appropriate area representative to ensure that the initiative meets the requirements for which it was developed. Our signatory contractors will be required to do the same.

Thank you once again for your feedback on this issue and I expect all locals to co-operate fully to ensure that this program enables us to regain market share and increase job opportunities for our members from coast to coast.

Fraternally Yours,

John Telford
Director of Canadian Affairs, UA
