Choosing the right project delivery method is a crucial strategic decision. Many projects require traditional methods - while others benefit from new and different approaches.

This Canadian Construction Documents Committee (CCDC) document release includes a guide examining the processes behind a variety of project delivery methods and introduces a new standard contract for integrated project delivery (IPD).

- **CCDC 30 – 2018: Integrated Project Delivery Contract**
- **CCDC 10 – 2018: A Guide to Construction Project Delivery Methods**

**CCDC 30 - Integrated Project Delivery Contract** provides a standard contract solution for IPD methodology. CCDC 30 is the first IPD contract made in Canada exclusively for Canadian construction projects. [Download one-page PDF](#)

**CCDC 10 – A Guide to Construction Project Delivery Methods** offers guiding principles to assist owners in selecting the most appropriate delivery method for a particular construction project. Owners selecting IPD as their method of choice are recommended to use CCDC 30 for a standard contract solution. [Download one-page PDF](#)

## **Want to build trust for your project?**

CCDC's volunteer experts are driven to improve the Canadian construction industry for everyone involved. Our document development process represents all parties involved in the project to ensure risk is allocated fairly, full consensus is reached, and real trust is built. This simplifies bidding and contracting. [ccdc.org](http://ccdc.org)
