The following is a list of courses that are being offered by the NBCSA. If you would like to register for any of these courses please contact **Krista Jardine** at 506-627-1477, by e-mail at registration@nbcsa.ca or fax at 506-624-9581. **NOTE:** All of our courses are available in any area, providing there are sufficient numbers of interested participants or if the company (companies) wish to cover a **minimum class recovery fee** to put on the course.
New to NBCSA – Manlift Awareness On-Line!

**We have Safety Orientation, WHMIS,
 Confined Space Awareness Refresher and Fall Protection Refresher On-Line***

***Please note:** Students taking the On-Line Fall Protection Refresher are only permitted to refresh on-line once every six years. This means that if a person has taken a classroom course, when their certificate is up for expiry they can take the Refresher On-Line, however when that certificate expires they must take the classroom course.

Due to the high demand, additional courses may have been added to our schedule with more being added every week. Please check this bulletin for added dates. Dates in bold have been added to the regular schedule.

MONCTON AREA

CONSTRUCT
AEC EDUCATION & EXPO

EDUCATION: October 9-11, 2019
EXHIBITS: October 10-11, 2019
National Harbor, MD, USA
Gaylord National Resort & Convention Center

**REFINE YOUR SKILLS &
INCREASE YOUR KNOWLEDGE**

CONSTRUCT is the premier AEC event where the different disciplines in the industry come together to learn. Join Architects, Designers, Engineers, Specifiers, Project Managers, Contractors, Estimators, Owners, Product Reps and more.

Connect with the AEC community in collaborative spaces to share best practices, explore innovative projects, and learn the latest in commercial construction design and processes.

- Select from **50+ Educational Sessions**
- Earn **18+ hours of CEU's** with AIA LUs/HSW, BOMI, GBCI, ICC, IIBEC, and/or NARI
- Participate in **Technical Tours** and an **Interactive Luncheon**
- See the Latest Products, Services, and Technology from **175+ Exhibitors**
- Experience **Live Product Demos & Presentations** in the Expo Hall
- Engage with Products in **Hands-On Workshop Sessions**
- Connect with Colleagues in the **Education Networking Lounge**
- Share Best Practices with Peers in the **Coffee Talk Lounge**
- Have a little fun at the **CONSTRUCT Welcome Reception** and the **CSI Night Out**

**Download the Event
Brochure**

Now available: updated Introduction to Construction Estimating course /
Le cours Introduction à l'évaluation en construction a été mis à jour.

We've completely revamped the **Introduction to Construction Estimating** online course:

- edited and simplified content
- updated review and test questions
- new info on scheduling, completing quantity takeoffs, calculating labour and crew rates
- more interactive games
- now works on tablets and smartphones

Lessons cover a wide range of topics, with interactive activities based on real-life field situations to help reinforce the lessons.

For more info, visit the [Construction E-Learning website](#).

Check out our marketing video above!

Nous avons complètement revu le cours en ligne **Introduction à l'évaluation en construction** :

- contenu simplifié
- nouvelles questions
- nouvelle matière sur l'échéancier, les avant-métrés et la rémunération de base ou d'équipe
- plus de jeux interactifs
- fonctionne maintenant sur tablette et téléphone intelligent

Les leçons abordent un large éventail de sujets et comprennent des activités interactives qui reposent sur des situations de chantier réelles pour aider à renforcer les leçons.

Pour en savoir plus, visitez le [Centre d'apprentissage en ligne](#).

Registration is now open for the Canadian Design-Build Institute's (CDBI) conference October 17 – 18 in Montreal and tutorial day on October 16. Join over 150 delegates representing the design and consulting community, contractors as well as public- and private-sector owners. This event offers a unique opportunity to familiarize yourself with some of the evolving trends (e.g. progressive design-build, modified design-build), best practices and technology for design-build projects as well as to meet and learn from other practitioners and leading experts. Visit the [CDBI website](#) for more information and to register!

Dear colleagues,

As you are aware, the Canadian construction industry is ever evolving and providing up-to-date education is an important aspect of keeping all members engaged with current best practices and trends. Recognizing the importance of education, CCA is proud to announce the launch of *Construction 101 and beyond*.

Well recognized in the industry, *Construction 101* remains an in-demand course that has something for everyone – from new members to the most experienced.

What's new?

With an emphasis on a more engaging and robust content, this new course is almost double the previous manual:

- **New content:** Relevant content has been added on topics such as BIM and Lean. There is also a more in-depth look at CCDC documents.
- **Content updates:** Content has been updated to more accurately reflect today's fast-paced industry.
- **More images:** More figures, diagrams and examples of documents have been added, making the content more engaging and easier to understand.
- **Updated look:** The *Construction 101* materials have received an updated look with new branding. The manual is now spiral bound.
- **Participant feedback:** We are introducing an online survey to collect feedback on the participants' course experience including how they learned about the course, quality of the materials and instructor experience. Results from the survey will be shared monthly with each organizing association.
- **Promotional materials:** CCA has developed new promotional materials to help you promote the updated course. Use #Construction101 and we will help promote and share your stories through CCA's social media networks.

The updated manuals are now available to order for \$45 + tax (and shipping). Currently at the printer, the first batch of updated manuals will arrive at the CCA offices on September 9 at the latest. If you are interested in ordering manuals for an upcoming course, please contact Julia DeVries jdevries@cca-acc.com. Please note that you should reserve at least 3 weeks for shipping in case we need to print more manuals. You can also contact Julia to order a reference copy for your instructors.

To access the new promo materials, the PowerPoint slides and a copy of the manual's table of contents, please click on the button.

Course materials

If you have any questions on the *Construction 101 and beyond* course, please contact our director of workforce excellence, Kirsie O'Connor, at koconnor@cca-acc.com or 613-236-9455, ext. 409.

Best regards,

Mary Van Buren, MBA, CAE

DESTINATION Canada FORUM MOBILITÉ

Vous êtes à la recherche de personnel qualifié? Nous pouvons vous aider!

Une équipe du **RDÉE NB** sera présente au forum de l'emploi Destination Canada à Paris et Bruxelles du 15 au 19 novembre pour représenter **gratuitement** les employeurs à la recherche de personnel qualifié. Ce forum offre une occasion unique de rejoindre un nombre important de candidats qualifiés et prêts à l'immigration. En travaillant étroitement avec les employeurs, nous pourrions informer les candidats sur les emplois à pourvoir dans la province.

Il suffit de nous contacter afin de discuter de vos besoins. Notre équipe veillera à vous rapporter des candidatures ciblées pour vos postes à combler. Faites leur parvenir vos offres d'emploi le plus tôt possible.

Pour information sur Destination Canada : <http://www.destination-canada-forum-emploi.ca/accueil.php?lang=fr>

The construction industry is poised for disruption, digital technologies and processes are transforming the traditional planning, design, construction and operation of the built environment. Digital transformation will result in time savings, increased quality, improved safety, greater sustainability and waste reduction. New processes like off-site construction (pre-fabrication & modularization), digital workflows and the adoption of new automation technology are propelling the industry into a more productive and efficient future.

This session will host senior management executives, technology leaders and prominent researchers who will demonstrate how the design, construction and facility management industry are embracing digital transformation and benefiting from adopting new technologies and processes. Join us in Fredericton at the University of New Brunswick, home to Canada's first engineering program and the newly established Off-site Construction Research Centre (OCRC) – a collaborative research hub connecting industry and academia in partnership with OSCO Construction Group.

Family Trust Still an effective tax planning tool?

NBCC Moncton
1234 Mountain Road, Moncton

Thursday, October 10th
Registration & networking : 7:45am
Workshop & breakfast : 8:00am - 9:30am

Family trusts have been used in tax planning strategies for decades and have created significant income tax savings under appropriate circumstances. However, substantial changes to the income tax rules that took effect in January 2018 have had an impact on the benefits. Even though income splitting planning has been curtailed in many situations, a family trust may nevertheless provide many other advantages. This session will highlight these benefits and explore some of the key issues to consider when planning with family trusts.
