

NEWS & EVENTS
July 17, 2020

DATE	2020 EVENTS	LOCATION
September 17, 2020	Golf – Shot Gun Start – Only 25 Teams Sold Out – Waiting List has been started	Lakeside Golf Club

The following is a list of courses that are being offered by the NBCSA. If you would like to register for any of these courses please contact **Krista Jardine** at 506-627-1477, by e-mail at registration@nbcsa.ca or fax at 506-624-9581. **NOTE:** All of our courses are available in any area, providing there are sufficient numbers of interested participants or if the company (companies) wish to cover a **minimum class recovery fee** to put on the course.

We are Open For Business

We are now accepting registrations for upcoming courses. Our classroom sizes will be adjusted to meet social distancing guidelines in each location. All participants must follow the COVID-19 guidelines. All participants are required to wear a mask that meets these requirements.

Dates beyond the ones listed below can be found on our website at www.nbcsa.ca

We now have Principles of Loss Control, Lock Out Awareness and Traffic Control Person/WATCM Awareness available on line.

Coming soon: Trenching Awareness & Workplace Violence & Harassment

**We have Safety Orientation, WHMIS,
Confined Space Awareness Refresher and Fall Protection Refresher On-Line***

***Please note:** Students taking the On-Line Fall Protection Refresher are only permitted to refresh on-line once every six years. This means that if a person has taken a classroom course, when their certificate is up for expiry they can take the Refresher On-Line, however when that certificate expires they must take the classroom course.

Highlights

Message from the Chair: Understanding the journey to net-zero

As we adjust to the new COVID-19 reality and evolving global, national and regional response plans, the Atlantica Centre for Energy remains focused on how our region's energy sector is contributing to the economic recovery.

We are also looking beyond COVID-19 to do a deeper dive on issues, such as the emerging policy commitments by various levels of government to a "net-zero" future and the reduction of greenhouse gas emissions.

The centre remains an active participant and contributor in exploring our region's transition to a clean energy future. [*Read more*](#)

Exploring hydrogen as a fuel source in the Maritimes

As the drive to net-zero carbon emissions intensifies, the Offshore Energy Research Association is spearheading an effort to explore the use of hydrogen as a fuel source in the region.

"The role of hydrogen in deeply decarbonized energy systems has been thoroughly discussed within the academic community, but industrial applications and emerging business development opportunities are only now coming into focus," the Halifax-based non-profit research organization says in a request for proposals to conduct a study into hydrogen production, storage, distribution and use in the Maritimes.

New Brunswick has lost its innovative edge, economist argues

Herb Emery, a regional economist at the University of New Brunswick, argues New Brunswick has lost its leadership position as a 'living lab' for innovation and has become a 'living museum' content with resting on its past success.

“It is clear that something has derailed the province when it comes to being a place for innovation and ‘tech savvy’ citizens. Still, I have met many in the province who see business growth opportunities and social innovation potential, and they continue to push to improve the situation in the province despite withering indifference to their effort on the part of government and the majority of New Brunswickers,” he wrote recently.

“As Colleen d’Entremont of the Atlantica Centre for Energy observed on a recent Matt George Growing Pains/Turning Point podcast, the attitude in New Brunswick has defaulted to explaining to people why their idea won’t work here instead of thinking about what it would take to have it succeed here.”

Net-zero challenge a ‘moon shot’

Ottawa says it is pondering a wide range of options to meet its target of net-zero carbon emissions by 2050, including hydrogen, geothermal and small modular nuclear reactors as future sources of energy and embracing carbon capture.

In an online interview with the ARC Energy Research Institute in Calgary, Natural Resources Minister Seamus O’Regan compared the net-zero goal to the late U.S. president John F. Kennedy’s vow in May 1961 to put a man on the moon.

“Net zero is a moon-shot. A moon shot is a very specific goal – Kennedy said we’re going to get to the moon. And the teams at NASA had to figure out how to do it. By 1969, they had a man on the moon,” O’Regan was quoted in news reports as saying. “If we could do it in eight years that would be great.”

Wind energy propels Summerside in its ‘green city’ goal

In its drive to be a “100 per cent green city,” Summerside, PEI recently reported one of its highest achievements yet for wind energy feeding its municipal grid. Local officials reported recently that 61 per cent of power demand for the island’s second-largest city was met with wind power in May.

Summerside Electric, which is owned by the municipality, powers about 6,200 residential, 970 commercial and 30 industrial customers, and also sells to NB

Power. The city owns the Summerside Wind Farm, and projects that wind energy will generate \$2.9 million this year for the municipality. *Read more*

Efficiency PEI agency lands national award

Efficiency PEI has won a national Energy Star Award naming it Advocate of the Year for 2020, saluting its exceptional achievements in promoting and improving energy efficiency.

The Energy Star Canada Participant Awards, now in the 17th year, recognize organizations that have demonstrated excellence in promoting the most energy-efficient products and new homes in Canada.

Cavern storage plan in Nova Scotia not a threat to fish: study

A new study by researchers at Dalhousie University concludes that a plan by Alton Natural Gas Storage to release brine water into a nearby river while creating caverns for natural gas storage does not pose a risk to striped bass reproduction.

The company is developing an underground natural gas storage facility – the only one of its kind in Atlantic Canada – in the Stewiacke Salt Formation near Alton, N.S., about 70 kms from Halifax. *Read more*

Atlantica news: National advisory appointment & UN Association virtual event

Atlantica Centre for Energy President Colleen d'Entremont accepted an invitation to join the external advisory committee of the Canadian Centre for Energy Information, a five-year program to build an independent, one-stop shop for comprehensive energy data.

And d'Entremont, along with NB Power's Brett Plummer were invited by the United Nations Association in Canada on June 25 to discuss the potential of small

modular reactors to address a low-carbon energy future for the globe. [***Read more***](#)

Surviving the Economic Recovery: [Living with COVID-19, July 14, 10 a.m.](#)

The Atlantic Provinces Economic Council is presenting a one-hour webinar, the fourth in a series on the impacts of COVID-19. This session will focus on the recovery and how to create a sustainable path forward. The webinar is free for both members and non-members but [advance registration is required](#).

The 16th annual Smart Energy Conference - Aug. 18-20

The virtual event will feature global energy speakers on new technologies and applications. The conference is an opportunity to virtually network with an expanded global energy audience and will feature: five hours of sessions & networking daily, access to virtual exhibitors showcasing their tech & products, access to all 32 keynote and session recordings and more.

Partner workshops are being delivered as weekly webinars presented by [energytalks.ca](#) leading up to the conference. Webinars begin July 8 and run every Wednesday to Aug. 12.

Energy Fundamentals for Leaders

Inquire today if you are interested in the [Energy Fundamentals for Leaders](#) program offered through the University of New Brunswick – the next cohort begins in October.

The Atlantica Centre for Energy is dedicated to increasing energy literacy for community leaders and stakeholders in New England, New Brunswick, Nova Scotia, Newfoundland & Labrador, PEI, Ontario and Alberta.
